MINAURUM SILVER INC

Forward Looking Statement

Information Contained in this Presentation

This presentation (the “**Presentation**”) is a summary description of Minaurum Silver Inc. (“**Minaurum**” or the “**Company**”) and its business and does not purport to be complete. This presentation is not, and in no circumstances is it to be construed as, a prospectus, an advertisement, or a public offering of securities. No securities regulatory authority or similar authority has reviewed or in any way passed upon the document or the merits of the Company's securities and any representation to the contrary is an offence.

Except where otherwise indicated, the information contained in this Presentation has been prepared by Minaurum and there is no representation or warranty by Minaurum or any other person as to the accuracy or completeness of the information set forth herein. Except as otherwise stated, information included in this Presentation is given as of the date hereof. The delivery of this Presentation shall not imply that the information herein is correct as of any date after the date hereof.

The footnotes, endnotes and appendices to this presentation contain important information. The endnotes and appendices are found at the end of the presentation.

Cautionary Note Regarding Forward-Looking Information

This Presentation includes “forward-looking statements” and “forward-looking information” within the meaning of Canadian securities legislation. All statements included in this Presentation, other than statements of historical fact, are forward-looking statements. When used in this presentation, words such as “may”, “would”, “could”, “will”, “intend”, “expect”, “believe”, “plan”, “anticipate”, “estimate”, “scheduled”, “forecast”, “predict”, “foresee” and other similar terminology, or sentences/statements that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved are intended to identify forward-looking statements, which, by their very nature, are not guarantees of the Company's future operational or financial performance. These statements reflect the Company's current expectations regarding future events, performance and results, and are accurate only at the time of this Presentation and may be superseded by more current information.

Forward-looking statements also involve known and unknown risks, uncertainties and other factors, which may cause the actual results, performance or achievements of the Company or its mineral projects to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or information.

In making such statements, the Company has made assumptions regarding, among other things: general business and economic conditions; the availability of additional exploration and mineral project financing; the supply and demand for, inventories of, and the level and volatility of the prices of metals; relationships with strategic partners; the timing and receipt of governmental permits and approvals; the timing and receipt of community and landowner approvals; changes in regulations; political factors; the accuracy of the Company's interpretation of drill results; the geology, grade and continuity of the Company's mineral deposits; the availability of equipment, skilled labour and services needed for the exploration and development of mineral properties; and currency fluctuations.

This Presentation also contains references to estimates of Mineral Resources. The estimation of Mineral Resources is inherently

uncertain and involves subjective judgments about many relevant factors. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. The accuracy of any such estimates is a function of the quantity and quality of available data, and of the assumptions made and judgments used in engineering and geological interpretation, which may prove to be unreliable and depend, to a certain extent, upon the analysis of drilling results and statistical inferences that ultimately may prove to be inaccurate. Mineral Resource estimates may have to be re-estimated based on: (i) fluctuations in mineral prices; (ii) results of drilling; (iii) metallurgical testing and other studies; (iv) proposed and completed mining exploration programs; (v) the evaluation of exploration and drilling plans subsequent to the date of any estimates; and (vi) the possible failure to receive required permits, approvals and licenses.

Although the forward-looking statements or information contained in this Presentation are based upon what management of the Company believes are reasonable assumptions, the Company cannot assure investors that actual results will be consistent with these forward-looking statements. They should not be read as guarantees of future performance or results. A number of factors could cause actual results to differ materially from the results discussed in the forward-looking statements, including, but not limited to: unanticipated changes in general business and economic conditions or conditions in the financial markets; fluctuations in the price of metals; stock market volatility; the availability of exploration capital and financing generally; changes in national and local government legislation; changes to taxation; changes in interest or currency exchange rates; loss of key personnel; inaccurate geological assumptions; legal disputes or unanticipated outcomes of legal proceedings; social unrest; competition; unavailability of materials and equipment; government action or delays in the receipt of permits or government approvals; community member disturbances; industrial disturbances or other job action; and unanticipated events related to health, safety and environmental matters, including the impact of epidemics and any escalation in the severity of the COVID-19 pandemic. Forward-looking information is designed to help readers understand management's current views of the Company's near and longer-term prospects, and it may not be appropriate for other purposes. The Company will not update any forward-looking statements or forward-looking information unless required to by applicable securities laws. The forward-looking statements contained herein are based on information available and are made as of the date hereof.

Technical Information

The scientific or technical information in this Presentation has been prepared under the supervision of and reviewed by Mr. Stephen R. Maynard, M.S., C.P.G., a “qualified person” as defined in National Instrument 43-101 – Standards of Disclosure for Mineral Projects and Vice President Exploration of the Company.

The Mineral Resources for the Alamos Project disclosed in this Presentation have been estimated by Michael G. Hester, FAusIMM Vice President of Independent Mining Consultants, Inc. and independent of Minaurum. Mr. Hester is a Qualified Person as defined in NI 43-101. The Mineral Resources have been classified in accordance with CIM Definition Standards for Mineral Resources and Mineral Reserves, adopted by CIM council, as amended. Please refer to 43-101 Technical Report Mineral Resource Estimate February 17, 2026 on [SEDAR](#)

Silver-equivalent grades are based on October 1, 2025, Long-term CIBC Global Mining Group Analyst Consensus Commodity Price Forecast: Ag \$29.73/oz, Au \$2,646/oz, Cu \$4.34/lb, Pb \$0.92/lb, Zn \$1.21/lb. Metal recovery assumptions based on comparable projects: 88.3% Ag, 75% Au, 75.5% Cu, 83.1% Pb, 75.5% Zn.

237 M lbs Zn

Conservative & Robust Inferred Resource

Vein Zones	Average Grade							Metal Content					
	Mass	AgEq	Ag	Au	Cu	Pb	Zn	AgEq	Ag	Au	Cu	Pb	Zn
	Ktonnes	(g/t)	(g/t)	(g/t)	(%)	(%)	(%)	(koz)	(koz)	(koz)	(klbs)	(klbs)	(klbs)
Promontorio	3,231	276	140	0.31	0.39	1.17	2.46	28,691	14,532	31.86	27,431	83,100	175,023
Europa	2,135	386	295	0.06	0.50	0.67	1.33	26,463	20,274	3.78	23,554	31,669	62,775
Grand Total	5,366	320	202	0.21	0.43	0.97	2.01	55,154	34,806	35.64	50,985	114,769	237,798

Notes:
The Mineral Resource estimate conforms to the requirements of NI 43-101 - Standards of Disclosure for Mineral Projects and the CIM Definition Standards for Mineral Resources and Mineral Reserves (2014). The Mineral Resource estimate is entirely classified as Inferred Mineral Resources. Inferred Mineral Resources have been estimated from geological evidence and limited sampling and have a lower level of confidence than Measured and Indicated Mineral Resources and must not be converted to Mineral Reserves. There is no certainty that Inferred Mineral Resources will be converted to Measured or Indicated Mineral Resources.
Weight-averaged silver equivalent ("AgEq") grades are based on the October 1, 2023 long-term CIBC Global Mining Group Analyst Consensus Commodity Price Forecast, using metal prices of US\$29.73/oz Ag, US\$2,646/oz Au, US\$4.34/lb Cu, US\$5.92/lb Pb, and US\$1.21/lb Zn. Metal recovery assumptions, based on comparable projects, are 88.3% Ag, 73.0% Au, 75.5% Cu, 83.2% Pb, and 73.5% Zn. Assumed refinery payables are 95% Ag, 95% Au, 96.5% Cu, 95% Pb, and 85% Zn.
The Mineral Resource is reported at a cut-off grade of 150 g/t AgEq.
Bulk density values applied are 2.72 t/m³ for the Promontorio and Travesía zone veins and 2.65 t/m³ for the Europa zone veins.
The Mineral Resource estimate is reported on a 100% project basis and reflects reasonable prospects for eventual economic extraction.
The effective date of the Mineral Resource estimate is January 8, 2025.
There are no known legal, political, environmental, or other risks that, to the knowledge of the Qualified Persons, could materially affect the potential development of the Mineral Resources.
All figures are rounded to reflect the relative accuracy of the estimate. Totals may not sum exactly due to rounding.

Metal Value Distribution

Sensitivity Analysis

Metal Content and Grade are Resilient at Various Cut-Offs

Three High Priority Targets

- **Promontorio, Europa-Guadalupe & Travesía**
- Open mineralization ready for systematic expansion along known regional trends

Piedras Verdes Mine

Alamos Project All Concessions

Cross Section of Maiden Resource Target Zones
9 + Veins within a distance of ~ 500 m.

1. Promontorio Vein Zone (inc. Travesía)

- ~ 4,000 m cumulative mineralized strike length tested to date in 5 different sub-parallel veins
- Average width of mineralization is 5.4 m (all veins weighted average)
- Average grade¹ of **179 g/t Ag, 0.5% Cu, 1.4% Pb, and 2.9% Zn, or 348 g/t AgEq***

Promontorio High Grade

Massive-Sulfide Vein Boulder from Promontorio Vein Zone

3,320 g/t Ag, 54.7 gpt Au, 25% Cu, 6.5%, and 1.1% Zn or 10,860 g/t AgEq*

High Grade Drill Intercept: AL24-111 – “Veta Oeste”

From 60.1 m to 80.8 m: **14.2 m Est. True Thickness @ 583 g/t Ag, 0.7 gpt Au, 0.28 % Cu, 2.2% Pb, and 3.2% Zn or 809 g/t AgEq***

Includes:

From 65.8 m to 67.4 m: **1.3 m Est. True Thickness @ 6,020 g/t Ag, 7.2 gpt Au, 1.8 % Cu, 16.3% Pb, and 16.4% Zn or 7,645 g/t AgEq***

¹Based on vein intercepts above 150 gpt AgEq* on a minimum 1 meter interval.
*Silver-equivalent grades are based on October 1, 2025, Long-term CIBC Global Mining Group Analyst Consensus Commodity Price Forecast: Ag \$29.73/oz, Au \$2,646/oz, Cu \$4.34/lb, Pb \$0.92/lb, Zn \$1.21/lb.

- Drilling to date at Promontorio and Promontorio Sur show significant **skarn/carbonate replacement (CRD) mineralization** hosted by limestone in the footwall of the vein zones. Hole AL25-138 intersected a significant wide zone of skarn/CRD lead- and zinc-sulfide mineralization including silver and gold values: **21.45 m of 220 g/t AgEq** including **1.00 m of 497 g/t AgEq** and **1.20 m of 1,377 g/t AgEq (440 g/t Ag, 1.499 g/t Au, 9.089% Pb, 18.783% Zn)**

Underground Rehabilitation

Advanced 600 m on haulage level and the 55 m deep Balvanera shaft

Longitudinal section of Promontorio mine showing relationship of workings to January 2026 estimated inferred resource

Balvanera shaft hoist room. Note yellow safety railing around Balvanera shaft collar at center-right of image and gray electrical control panel in center-left background. Orange air duct leads into shaft to provide ventilation. Steel casing slanting from right to left in left foreground contains electrical cable from for lighting and welding and other tools. The wooden beam above the shaft collar is a vestige of historical hoisting equipment.

View of portion of Promontorio vein zone in immediate hanging wall of fault plane, Tirito shaft area.

View down 55 m-deep Balvanera shaft. Note historical timbered shaft walls, recently installed marine ladder and ventilation duct. The ladder reaches 45 m depth and provides access to 3 lower levels at 12, 20, and 45 m

Underground Exploration

Underground channel sampling conducted across mineralized structures along the edges of historically mined stopes returned the following highlights:

- **0.30 m of 4,142 g/t AgEq**
(3,860 g/t Ag, 0.42 g/t Au, 1.91% Cu, 1.58% Pb, 2.21% Zn) (Sample 101307)
- **0.50 m of 704 g/t AgEq**
(275 g/t Ag, 1.23 g/t Au, 0.34% Cu, 0.39% Pb, 13.35% Zn) (Sample 101277)
- **0.50 m of 733 g/t AgEq**
(282 g/t Ag, 2.67 g/t Au, 0.36% Cu, 0.52% Pb, 8.07% Zn) (Sample 101276)
- **0.50 m of 480 g/t AgEq**
(386 g/t Ag, 0.12 g/t Au, 0.69% Cu, 0.27% Pb, 0.82% Zn) (Sample 101297)

Assays for selected elements of rock samples, Promontorio mine. Weight-averaged silver-equivalent grades (AgEq g/t) are based on the October 1, 2025 Long-term CIBC Global Mining Group Analyst Consensus Commodity Price Forecast: Ag \$29.73/tr oz, Au \$2,646/tr oz, Cu \$4.34/lb, Pb \$0.92/lb, Zn \$1.21/lb. Metallurgical recovery assumption: 88.3% for Ag, 88.5% for Au, 75.5% for Cu, 83% for Pb, 75% for Zn. See news release dated September 22, 2026.

2. Europa-Guadalupe Vein Zone

- > 3,000 m cumulative mineralized strike length tested to date in 4 sub-parallel veins
- Average width of mineralization¹ is 3.1 m
- Average grade of **347 g/t Ag, 0.6% Cu, 0.9% Pb, and 1.5% Zn, or 456 g/t AgEq***

Europa-Guadalupe High Grade

High Grade Drill Intercept: AL17-007 – “Veta Europa”

From 534.7 m to 542.9 m: **8.1 m Est. True Thickness @ 1,767 g/t Ag, 0.06 gpt Au, 1.6 % Cu, 1.5 % Pb, and 2.6 % Zn or 2,037 g/t AgEq***

Includes:

From 534.7 m to 536.9 m: **2.1 m Est. True Thickness @ 5,098 g/t Ag, 0.04 gpt Au, 2.8 % Cu, 0.5 % Pb, and 1.2 % Zn or 5,426 g/t AgEq***

¹Based on vein intercepts above 150 gpt AgEq* on a minimum 1 meter interval.

*Silver-equivalent grades are based on October 1, 2025, Long-term CIBC Global Mining Group Analyst Consensus Commodity Price Forecast: Ag \$29.73/oz, Au \$2,646/oz, Cu \$4.34/lb, Pb \$0.92/lb, Zn \$1.21/lb.

Europa Vein Zone

High Grade Extension > 900 m

EUROPA-GUADALUPE VEIN ZONE LONG SECTION - RESOURCE PHASE II DRILL PLAN

- Extended high-grade mineralization along strike, defining new zone "Europa Sur"
- Hole AL25-163 intersected a significant wide interval of **12.35 m zone** averaging **408 g/t AgEq**, including **3.20 m of 1,277 g/t AgEq** (1,032 g/t Ag, 0.278 g/t Au, 0.69% Cu, 5.48% Pb, 2.38% Zn)
- Hole AL26-196: **3.20 m of 882 g/t AgEq** or **453 g/t Ag, 1.19 g/t Au, 2.29% Cu, 1.50% Pb, 1.99% Zn** including **0.95 m of 2,423 g/t AgEq** or **1,266 g/t Ag, 3.08 g/t Au, 8.01% Cu, 4.17% Pb, 4.96% Zn**
- Higher-temperature mineralization in Europa Sur, possibly associated with a feeder zone

Results bolster prior Minaurum high-grade intercepts including a wide intercept of **12.35 m of 408 g/t AgEq (318 g/t Ag, 0.09 g/t Au, 0.35% Cu, 1.60% Pb, 0.90% Zn) (AL25-163)**, and **0.60 m of 828 g/t AgEq (701 g/t Ag, 0.07 g/t Au, 0.34% Cu, 0.52% Pb, 3.39% Zn) (AL26-186)**, and **3.20 m of 882 g/t AgEq (453 g/t Ag, 1.19 g/t Au, 2.88% Cu, 1.49% Zn, 1.98% Pb) (AL26-196)**

Path to 100,000,000 Oz AgEq

- High-Grade Mineralization Identified by drilling in multiple additional vein zones in the project; Phase II - 50,000 m Resource Expansion Drill Program
- **Minas Nuevas, Alessandra, San José, and Pulpito-Coteria Vein Zones** are ready for systematic infill and expansion to incorporate into potential near future resources
- Multiple other high potential vein zones: **Quintera, Animas, Promontorio Sur** are wide open along strike and to depth.

QUINTERA VEIN ZONE RESOURCE PHASE II DRILL PROGRAM

Target Strike Length >1,000 m

*Silver-equivalent grades are calculated using the October 1, 2025, long-term CIBC Global Mining Group Analyst Consensus Commodity Price Forecast of US\$29.73/oz Ag, US\$2,646/oz Au, US\$4.34/lb Cu, US\$0.92/lb Pb, and US\$1.21/lb Zn. Metallurgical recovery assumptions applied are 88.3% for Ag, 88.5% for Au, 75.5% for Cu, 83% for Pb, and 75% for Zn.

Quintera

KEY FINDINGS:

1. 100M oz Historical Producer
2. Mined on limited footprint due its super high grade and width
3. Opportunity to find multiple “Super Shoots” in highly-prospective structure ready for systematic exploration
4. On trend with Promontorio Zone

*Silver-equivalent grades are based on October 1, 2025, Long-term CIBC Global Mining Group Analyst Consensus Commodity Price Forecast: Ag \$29.73/oz, Au \$2,646/oz, Cu \$4.34/lb, Pb \$0.92/lb, Zn \$1.21/lb.

Quintera Extends at Depth With Wide Widths

- **AL26-230** intersected a **significant width of high-grade silver**, cutting **26.30 m of 369 g/t AgEq (306 g/t Ag, 0.03 g/t Au, 0.37% Cu, 0.73% Pb, 0.61% Zn)**, **outside of the old mine workings** and about **75 m north of the high-grade intersections** of holes AL26-180 and AL26-188.
- The AL26-230 intercept is situated about 130 m up dip and 30 m north of hole **AL26-215**, which also returned **high-grade silver: 5.95 m of 1,117 g/t AgEq (953 g/t Ag, 0.05 g/t Au, 1.22% Cu, 1.58% Pb, 0.41% Zn)**
- **Hole AL26-230D** also returned a wide intersection: **9.35 m of 162 g/t AgEq (145 g/t Ag, 0.01 g/t Au, 0.14 % Cu, 0.08% Pb, 0.09% Zn).**

KEY FINDINGS:

1. 30 Moz Produced from Historical Minas Nuevas Underground Mines
2. Historic mining was focused on a limited footprint of ~ 250 m along strike by ~ 200 m dip length
3. Outstanding Silver grades and vein thickness identified by the drill bit outside of the historic workings (AL21-099)
4. Wide open for expansion along strike and to depth

*Silver-equivalent grades are based on October 1, 2025, Long-term CIBC Global Mining Group Analyst Consensus Commodity Price Forecast: Ag \$29.73/oz, Au \$2,646/oz, Cu \$4.34/lb, Pb \$0.92/lb, Zn \$1.21/lb.

Upcoming Investor Catalysts

- ✓ Established initial 55 Moz AgEq @ 320 g/t AgEq; exceeding target of 50 Moz AgEq
- ✓ Pathway to 100 Moz AgEq with several vein zone targets
 - Europa, Promontorio-Travesia
 - Quintera, San Jose, Alessandra, Coteria, Minas Nuevas
 - Appointed SGS to commence work on 43-101 updated resource
- ✓ Fully financed 50,000m drill program; drill results news flow
- ✓ Additional metallurgical testing
- ✓ Monetize or spin-out several non-core projects
 - Adelita Copper-Gold – 1% NSR

Opportunities in District-Scale Portfolio

Successful Exploration Demonstrates Upside

GOLD

Aurifero

3.1 m of 18.37 g/t Au
(Hole DMDDH-01)

24.5 m of 3.12 g/t Au
(Hole 07-MN-10)

58 m of 3.65 g/t Au
(Hole CI-09)

Santa Marta

Sampling of 11.54% copper
and 1.96 g/t gold

ZINC

Lone Mountain

118.87 m of 9.58% Zn and 0.74% Pb
(LM-15- 27)

24.7 m grading 23.06% Zn
(NLM-17-08)

Santa Marta – The Next Major Copper Discovery?

“Copper discoverer David Lowell noted...‘Santa Marta has a number of early geological indicators leading us to believe it could be a significant VMS deposit...the chances are good of finding a multimillion-tonne mineable copper-zinc-gold ore-body at Marta.’”

See Minaurum news release March 25, 2014 and ‘Intrepid Explorer: The Autobiography of the World’s Best Mine Finder’ page 390, paragraph 3

“VMS Expert Dr. James Franklin noted that based on his visual inspection, ‘Santa Marta appears to be a major massive sulfide deposit...It has all of the classic features of highly productive deposits, such as the semi-continuous deposit set at Flin Flon comprised of the Main Mine, Calinan and Triple 7...’”

See Minaurum news release June 19, 2013

“Quinton Hennigh noted, ...‘The Crescat Capital team sees the footprint of the system at Santa Marta as being comparable to that of the Hod Maden deposit in Turkey.’”

See Minaurum news release July 9, 2021

Santa Marta – Permitting Initial Drill Program

Commodity	Copper-Gold
Location	Eastern Oaxaca
Nearest City	Zanatepec, Oaxaca and major port of Salina Cruz
Nearest Major Mining Project	Fortuna Silver's San Jose Mine Gold Resource's El Aguila Mine
Land Package	6,410 has
	Two Zones: • Stringer Zone - Copper-rich and 300 m long • Massive Oxide-Silica Zone - Overlies stringer zone, more than 800 m long from 75 - 100 m thick
Exploration Highlights ¹	Sampling: • 1.1% copper over 25 meters in oxidized rock in old pit. • A silica-rich horizon, interpreted as a volcanic-exhalative lens, assayed 0.8 to 1.0 g/t gold across sample widths of up to 4 meters
Infrastructure	Gravel roads, power, water
Project Interest	Option to acquire 100% interest

Leached massive sulphide zone on west wall of the Santa Marta pit

MINAURUM SILVER INC

Responsible Exploration

Alamos Silver Project

Contributed \$2.4M in Responsible Exploration Initiatives¹

- ✓ Planted over 22,000 Agave plants for the community
- ✓ Built a community nursery for the growth of decorative, medicinal plants as well as fruits and vegetables
- ✓ Donated two 100,000-liter geomembrane water tanks for storage of potable clean water
- ✓ Built a Community Green Zone along with organizing educational workshops on the environment
- ✓ Utilized man-portable modular drills reducing environmental footprint
- ✓ Recirculated and recycled up to 70% of water used in exploration programs

- ✓ Provided medical and sanitation during COVID together with transportation to testing and vaccination clinics
- ✓ Provided monthly free COVID tests to the local community totaling 545 individual tests
- ✓ Supplied food and water packages containing staples such as rice, beans, fruits and vegetables
- ✓ Funded a plant nursery for local employment administered by a female committee
- ✓ Donated a 40,000-liter geo-membrane water basin for the nursery
- ✓ Provided employment opportunities to the local community including geologists, labourers, prospectors and drillers
- ✓ Created multiple microloan programs providing loans for new businesses and personal needs
- ✓ Donated equipment to the public safety department
- ✓ Provided soccer jerseys to local youth
- ✓ Invested in infrastructure including roads, property fences, household structures and public restroom facilities
- ✓ Provided education material and workshops including first aid courses
- ✓ Provided sewing machines to the local communities to make covid masks during the pandemic

- ✓ Minaurum practices high standards of conduct and communication between its local representatives and stakeholders including contractors and local communities.
- ✓ Minaurum holds regular meetings with local communities to ensure open lines of communication

Responsible Exploration Report
 2025 available on Minaurum
 website

¹Funds jointly contributed with Alamos project Optionor during period 2017-2025 calendar years. Minaurum contributed \$1,761,341; Optionor \$628,278.

APPENDIX

Inferred Mineral Resource Estimate Summary (150 g/t AgEq cut-off)

			Average Grade						Metal Content

Notes:

The Mineral Resource estimate conforms to the requirements of NI 43-101 – Standards of Disclosure for Mineral Projects and the CIM Definition Standards for Mineral Resources and Mineral Reserves (2014). The Mineral Resource estimate is entirely classified as Inferred Mineral Resources. Inferred Mineral Resources have been estimated from geological evidence and limited sampling and have a lower level of confidence than Measured and Indicated Mineral Resources and must not be converted to Mineral Reserves. There is no certainty that Inferred Mineral Resources will be converted to Measured or Indicated Mineral Resources.

Weight-averaged silver-equivalent ("AgEq") grades are based on the October 1, 2025 long-term CIBC Global Mining Group Analyst Consensus Commodity Price Forecast, using metal prices of US\$29.73/oz Ag, US\$2,646/oz Au, US\$4.34/lb Cu, US\$0.92/lb Pb, and US\$1.21/lb Zn. Metal recovery assumptions, based on comparable projects, are 88.3% Ag, 75.0% Au, 75.5% Cu, 83.1% Pb, and 75.5% Zn. Assumed refinery payables are 95% Ag, 95% Au, 96.5% Cu, 95% Pb, and 85% Zn.

The Mineral Resource is reported at a cut-off grade of 150 g/t AgEq.

Bulk density values applied are 2.72 t/m³ for the Promontorio and Travesia zone veins and 2.65 t/m³ for the Europa zone veins.

The Mineral Resource estimate is reported on a 100% project basis and reflects reasonable prospects for eventual economic extraction.

The effective date of the Mineral Resource estimate is January 8, 2026.

There are no known legal, political, environmental, or other risks that, to the knowledge of the Qualified Persons, could materially affect the potential development of the Mineral Resources.

All figures are rounded to reflect the relative accuracy of the estimate. Totals may not sum exactly due to rounding.

Please refer to 43-101 Technical Report Mineral Resource Estimate February 17, 2026 on SEDAR
