During the three months ended July 31, 2025, the Company paid \$52,430 (MXN\$727,122) (2024 – \$43,031 or MXN\$548,478) in IVA on expenditures incurred in Mexico. The collectability of these amounts is uncertain, therefore the Company has written off these amounts in exploration costs through profit and loss during the three months ended July 31, 2025 and 2024, respectively. During the three months ended July 31, 2025, the Company received or accrued \$nil (MXN\$nil) (2024 - \$151,651 or MXN\$1,932,974) in IVA refunds on expenditures incurred in Mexico in prior periods, which have been included as a recovery of exploration costs through profit and loss during the three months ended July 31, 2025 and 2024, respectively.

MINAURUM GOLD INC.

NOTES TO CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

THREE MONTHS ENDED JULY 31, 2025 AND 2024

(Expressed in Canadian dollars)

1. Nature and Continuance of Operations:

Minaurum Gold Inc. ("the Company") was incorporated under the Business Corporations Act of British Columbia on November 13, 2007. The Company is an exploration stage company and engages principally in the acquisition and exploration of mineral properties. The Company's head office address is Suite 1570 – 200 Burrard Street, Vancouver, BC, V6C 3L6, Canada. The registered and records office address is 10th Floor, 595 Howe Street, Vancouver, BC, V6C 2T5, Canada. The Company is listed on the TSX Venture Exchange.

The Company is in the process of exploring its exploration and evaluation assets and has not yet determined whether its exploration and evaluation assets contain economically recoverable mineral reserves. The underlying value and the recoverability of the amounts shown as exploration and evaluation assets are entirely dependent upon the existence of economically recoverable resource reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of the exploration and evaluation assets, and future profitable production or proceeds from the disposition of the exploration and evaluation assets.

The Company has a history of losses with no operating revenue, an accumulated deficit of \$69,082,668 since inception, and a working capital of \$7,154,583 as at July 31, 2025. During the three months ended July 31, 2025, the Company closed a brokered private placement with gross proceeds of \$9,200,000. Management recognizes that the Company, in the long term, will need to generate additional financial resources to meet its planned business objectives. However, there can be no assurances that the Company will continue to obtain additional financial resources and/or achieve profitability or positive cash flows. If the Company is unable to obtain adequate additional financing, the Company will be required to curtail operations and exploration activities. Furthermore, failure to continue as a going concern would require that the Company's assets and liabilities be restated on a liquidation basis which would differ significantly from the going concern basis. These material uncertainties may cast significant doubt about the Company's ability to continue as a going concern within one year from the date of filing of these condensed consolidated interim financial statements.

These condensed consolidated interim financial statements do not reflect adjustments, which could be material to the carrying values of assets and liabilities, which may be required should the Company be unable to continue as a going concern.

Recent global issues, including recent geopolitical conflict, have adversely affected workplaces, economies, supply chains and financial markets globally. It is not possible for the Company to predict the duration or magnitude of the adverse results of these issues and their effects on the Company's business or results of operations at this time.

2. Material Accounting Policies:

a) Basis of presentation:

These condensed consolidated interim financial statements including comparatives, have been prepared in accordance with International Accounts Standards ("IAS") 34, "Interim Financial Reporting" using accounting policies consistent with IFRS Accounting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB") and Interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC").

The condensed consolidated interim financial statements of the Company are presented in Canadian dollars, which is the functional currency of the parent company and its subsidiaries.

These condensed consolidated interim financial statements were authorized for issuance by the Board on September 22, 2025.

MINAURUM GOLD INC.

NOTES TO CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

THREE MONTHS ENDED JULY 31, 2025 AND 2024

(Expressed in Canadian dollars)

2. Material Accounting Policies (continued):

b) Basis of consolidation:

These condensed consolidated interim financial statements include the financial statements of the Company and its wholly-owned Mexican subsidiaries, Minera Minaurum Gold S.A. De C.V. and Minera Citation S.A. de C.V., which carry out exploration activities in Mexico, and its wholly-owned USA subsidiary, Minaurum Corp., a Delaware company, which carries out exploration activities in the USA. All material intercompany transactions and balances have been eliminated on consolidation.

c) Recent accounting pronouncements

Effective May 1, 2027, the Company is required to adopt *IFRS 18, Presentation and Disclosure in Financial Statements*, with early adoption permitted. IFRS 18 will replace IAS 1; many of the existing principles in IAS 1 are retained, with limited changes. IFRS 18 will not impact the recognition or measurement of items in the financial statements, but it might change what an entity reports as its operating profit or loss, in particular additional defined subtotals, disclosures about management-defined performance measures and new principles for aggregation and disaggregation of information. IFRS 18 is accompanied by limited amendments to the requirements in IAS 7, Statement of Cash Flows.

The Company is assessing the potential impact of the application of these standards.

d) Use of judgments and estimates:

The preparation of the condensed consolidated interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates.

The condensed consolidated interim financial statements include estimates which, by their nature, are uncertain. The impact of such estimates is pervasive throughout the financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical accounting estimates

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the financial position reporting date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

Recoverability of receivables

The Company estimates the recoverability of IVA paid on expenditures incurred in Mexico.

Share-based payments

The fair value of stock options and warrants issued are subject to the limitations of the Black-Scholes option pricing model that incorporates market data and involves uncertainty in estimates used by management in the assumptions.

(Expressed in Canadian dollars)

2. Material Accounting Policies (continued):

d) Use of judgments and estimates (continued):

Critical accounting estimates (continued)

Share-based payments (continued)

Because the Black-Scholes option pricing model requires the input of highly subjective assumptions, including the volatility of share prices, changes in subjective input assumptions can materially affect the fair value estimate.

Deferred income tax liability

The Company estimates the expected manner and timing of the realization or settlement of the carrying value of its assets and liabilities and applies the tax rates that are enacted or substantively enacted on the estimated dates of realization or settlement.

Critical accounting judgments

Examples of significant judgments, apart from those involving estimation, include:

Exploration and evaluation assets

Management is required to make judgments on the status of each mineral property and the future plans with respect to finding commercial reserves. The nature of exploration and evaluation activity is such that only a few projects are ultimately successful, and some assets are likely to become impaired in future periods.

Functional currency

The Company applied judgment in determining its functional currency and the functional currency of its subsidiaries. Functional currency was determined based on an analysis of the consideration factors in IAS 21, The Effects of Changes in Foreign Exchange Rates.

Going concern

The Company applied judgment in assessing its ability to continue as a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of operations for the foreseeable future.

3. Capital Management:

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of exploration and evaluation assets. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The capital structure of the Company consists of shareholders' equity. The Company is not exposed to any externally imposed capital requirements.

The exploration and evaluation assets in which the Company currently has an interest are in the exploration stage. As such the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

3. Capital Management (continued):

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the three months ended July 31, 2025 and 2024.

6. Exploration and Evaluation Assets (continued):

Title to exploration and evaluation assets involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many exploration and evaluation assets.

The Company has investigated title to its exploration and evaluation assets and to the best of its knowledge title to the assets is in good standing.

a) Aurena Property, Oaxaca State, Mexico:

On April 30, 2009, the Company acquired an option, subsequently amended, to earn a 100% interest in the Aurena Property for 3,500,000 shares (issued) and \$20,000 cash (paid). The property is subject to a net smelter return royalty ("NSR") of 3%. In November 2010, a related party of the Mexican company that is the optionor of the underlying agreement became a director of the Company.

The Company paid US\$140,000, issued 1,100,000 common shares valued at \$514,500 and incurred property expenditures of US\$2,500,000 to earn its 100% interest in the Aurena property.

Upon commencement of commercial production, the Company shall issue 2,000,000 shares to the vendor. The Company may elect to purchase up to 2% of the NSR for payment of the greater of US\$4,000,000 or the equivalent amount of 0.9999 fine physical gold measured in troy ounces priced at the New York closing spot price on the closing date.

b) Adelita Property, Sonora State, Mexico:

On April 23, 2010, the Company acquired an option, subsequently amended, to acquire a 100% interest in a mineral property known as the Adelita property, comprised primarily of a land package under option with a Mexican company that is the optionor of the underlying agreement, along with a minor claim under option with a separate landowner. In November 2010, a related party of the Mexican company became a director of the Company. In consideration, the Company paid \$1 to acquire the option.

The Company previously paid US\$595,000 and issued 925,000 common shares valued at \$470,000 pursuant to the option and owns 100% of the Adelita property.

The property is subject to an NSR of 2%. On April 8, 2021, the Company issued 200,000 common shares valued at \$80,000 to eliminate a commercial production payment of 500,000 common shares.

Option Agreement with Infinitum Copper Corp.

In the year ended April 30, 2021, the Company granted to Infinitum Copper Corp. ("Infinitum", formerly ASR Resources Corp.) an option to earn an 80% interest in the Adelita property. In consideration for the granted option, Infinitum paid the Company the following:

- a) \$50,000 on signing (received);
- b) \$43,333 in property taxes on or before 10 business days after signing (received); and
- c) \$25,000 on or before August 26, 2021 (received).

In addition, on the first day of listed trading on the TSX Venture Exchange or Canadian Securities Exchange ("Listing Date"), Infinitum must issue 16% of the total issued and outstanding common shares of Infinitum calculated post issuance to the Company (received 6,105,438 shares valued at \$2,442,175 during the year ended April 30, 2022). Infinitum must incur at least \$3,000,000 of expenditures on the Adelita property on or before five years from the Listing Date (completed by September 30, 2023).

Option Agreement with Infinitum Copper Corp. (continued)

After completing the option to earn 80%, the Company and Infinitum were in the process of entering into a joint venture agreement. The Company's 20% retained interest will be carried until Infinitum carries out a total of \$4,750,000 in expenditures along with completing both a mineral resource calculation in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects and a Preliminary Economic Assessment. Subsequent to July 31, 2025, the Company entered into an agreement to sell its 20% interest in the Adelita property (Note 11).

c) Vuelcos del Destino Property, Guerrero State, Mexico:

On April 3, 2010, the Company acquired an option, subsequently amended, to acquire a 100% interest in a mineral property known as the Vuelcos del Destino property, located in Mexico. In November 2010, the president of the Mexican company that is the optionor of the underlying agreement became a director of the Company. The property is subject to a NSR of 3%, of which the Company may purchase up to 2% for US\$2,000,000 per percentage point. In consideration, the Company paid \$1 to acquire the option.

To maintain the option on the property, the Company must pay an aggregate of US\$355,000 in cash (paid) and issue an aggregate of 3,650,000 common shares (issued at an aggregate value of \$1,004,500) and complete US\$2,000,000 in exploration expenditures by April 23, 2022 (\$1,570,291 incurred as at July 31, 2025).

On March 30, 2020, the option agreement was amended to extend the date of required expenditures from April 23, 2020 to April 23, 2022, unless the necessary permits required for drilling on the property are not obtained by April 23, 2021, in which case the time to complete the remaining option payments and expenditures will be extended by the corresponding additional amount of time required to obtain the necessary permits. As at July 31, 2025, the permits have not been obtained.

Upon commencement of commercial production, the Company must also issue an additional 2,000,000 common shares to a maximum aggregate value of US\$5,000,000.

Civil claim

During the three months ended July 31, 2025, the Company filed a Notice of Civil Claim in the Supreme Court of British Columbia against the optionors of the Vuelcos del Destino property in Mexico seeking damages, costs, and other relief. The claim is based on the Company's belief that it was in compliance with the terms of the agreement. The Company determined that due to the uncertainty of the standing of the option agreement, the property was impaired, and elected to write off the related acquisition costs of \$1,411,039 as at April 30, 2024.

d) Santa Marta Project, Oaxaca State, Mexico:

On October 7, 2010, the Company acquired an option, subsequently amended, from Minera Zalamera S.A. de C.V. ("Minera Zalamera"), to acquire a 100% interest in a mineral property known as the Santa Marta property, located in Mexico. The property is subject to an NSR of 3%. In consideration, the Company may purchase up to 2% of the NSR for US\$1,000,000 per 0.5%, payable at the Company's election in either cash or the equivalent of 0.9999 fine physical gold measured in troy ounces, priced at the New York gold closing price on the date of delivery.

10. Financial Instruments and Risk Management:

Financial instruments

The Company measures financial instruments using a fair value hierarchy that prioritizes the inputs to the valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

- Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2: Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability.
- Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The carrying values of cash, receivables, and accounts payable and accrued liabilities approximate their fair values because of the short-term nature of these instruments. Marketable securities are measured at level 1 inputs of the fair value hierarchy.

Financial risk factors

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

a) Credit risk:

Credit risk is the risk of loss associated with a counter party's inability to fulfill its payment obligations. The Company's receivables consist primarily of amounts due from Canadian and Mexican government agencies, and cash is held with large and stable financial institutions.

b) Liquidity risk:

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet its liabilities when they come due. As of July 31, 2025, the Company had cash of \$8,301,833 and current liabilities of \$1,356,285.

c) Market risk:

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

(i) Interest rate risk:

The Company has cash balances and no interest-bearing debt. The Company's current policy is to invest excess cash in investment-grade short-term demand deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

(ii) Foreign currency risk:

The Company is exposed to foreign currency risk on fluctuations related to cash, accounts receivable, and accounts payable and accrued liabilities that are denominated in United States Dollars and Mexican Pesos.

10. Financial Instruments and Risk Management (continued):

Financial risk factors (continued)

c) Market risk (continued):

(ii) Foreign currency risk (continued):

The exposure of the Company's cash and receivables to foreign exchange risk is as follows:

	July 31, 2025		April 30, 2025	
	Foreign currency amount	Amount in CAD dollars	Foreign currency amount	Amount in CAD dollars
United States dollars:				
Cash	248,975	\$ 344,544	818,485	\$ 1,131,040

Total financial liabilities		\$ 1,220,351		\$ 238,719

As at July 31, 2025, the Company had net monetary assets denominated in United States dollars totaling approximately US\$386,714. The Company has determined that a 10% increase or decrease in the US dollar against the Canadian dollar on these instruments, as at July 31, 2025, would result in approximately \$53,500 change to comprehensive loss for the period.

(iii) Price risk:

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatility. The Company closely monitors commodity prices of gold and other precious and base metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.
